INDIAN GENERAL ELECTION RESULT 2024

# Problem Statement

- The 2024 Indian General Election generated vast, fragmented data across alliances, parties, states, and constituencies, making quick insights difficult.
- Traditional news focuses on high-level numbers, leaving gaps in detailed analysis like state performance, constituency results, and vote-type breakdowns.
- There is a need for a centralized, interactive, and visually engaging solution that consolidates and simplifies this complex dataset.
- The dashboard fulfills this need by transforming static election results into an accessible, dynamic, and multi-level analytical tool.
